## TRACKLANDER RACKS

### Alloy Tracklander

- **Design strength** - Thick wall tubing
- **Evenly distribute load** - Flexible gutter support.
- **Protects vehicle at mounting points** - Heavy duty protection provided at all mounting points.
- **Safety and security** - Nyloc nuts withstand vibration. Incorporating an anti theft feature.
- **Handles the rough stuff** - Unique mounting system.
- **Strong and vibration free** - Heavy duty mesh base, welded at every contact point.
- **State of the art appearance** - High impact resistant, aerodynamic wind deflector.
- **Low maintenance finish** - UV Resistant, dark grey-hammertone powder coating.

## PRODUCTS

### RACKS

[TYPE OF FITTINGS](#)[ACCESSORIES](#)[RECOVERY GEAR STORAGE](#)[LADDERS](#)[VEHICLE FIT GUIDE](#)

### Open Ended Tracklander

Open-ended models are also stocked and are suited for carrying longer items.

A specially shaped wind deflector hangs below the rack to help minimise wind noise.

### Tent Topper Tracklander

Tent-topper models are available and as the name suggests, the rack comes with no top rail around the rear section of the rack to accommodate a roof top tent. This model still comes complete with a high impact resistant wind deflector and mesh

floor.

## Steel Tracklander

Most sizes are available in a steel construction, which comes with three coatings - A zinc galvanising, an etch primer then a heavy duty powder coated finish. Steel wind deflector as a standard.
